On page 66 under *Financial information and key performance indicators – Revenue* with the following information:

The company's revenue for the third quarter of 2021 was EUR 0.5 million (EUR 1.7 million) and the Company's revenue for the review period from 1 January 2021 to 30 September 2021 was EUR 2.2 million (EUR 3.7 million).

The development revenue development fell short of expectations both in the third quarter and throughout the review period. This was partly due to the postponement of the Company's customers' investment decisions during the Covid-19 pandemic, in addition to which many European operators have chosen to wait for the country-specific guidelines of the clean energy programmes under the EU Green Deal before their investment decisions.
